

## Security Pack BROADBAND INTERNET SECURITY

### Security

If the Internet is now critical to your everyday business operations, then our tailored solutions are for you. Our portfolio offers the very best in managed IP services and solutions including high capacity connectivity, dedicated server hosting, e-mail outsourcing, security, IP integration, project management and consulting. With all you would expect of a leading IP services provider, we deliver first-class solutions that not only meet your business needs today, but which have been designed with the flexibility to meet them for the future. As an established provider of IP services, we have a wealth of security technology experience and the resources needed to offer an unsurpassable range of security solutions. To ensure your business safety, we will work with you to help assess the risks and threats, and to minimise intrusion.

*Network is safe behind a secure firewall*

### Firewall security

Our appliance product line provides comprehensive, scalable security solutions, encompassing broadband telecommuters to large corporate offices, e-business sites, and carrier networks. The full-featured firewall uses technology based on stateful inspection, securing against intruders and Denial of Service (DoS) attacks. All appliances provide:

Integrated solution with security-optimised hardware, operating system and firewall, which provides higher level of security than patched together software-based solutions:

- Robust attack prevention, independently configurable on every interface, including SYN attack, ICMP flood, and Port Scan
- Network Address Translation (NAT), Port Address Translation (PAT), route, or transparent modes of operation
- The proprietary OS software is an ICSA certified stateful inspection firewall

### Hosting

Link Connect will host your domain name and email on our Domain Name Server (DNS). Link Connect has been an ISP since 1996, offering a complete portfolio of hosting solutions for business users. We offer hosting of your SMTP mail or up to 15 POP3 email addresses (although this could be unlimited through the use of aliases) .

**Link-Connect Services Limited**

## **Virus Protection**

Virus protection is vital for business continuity. With an estimated 85% of current viruses propagated by email, we are helping to tackle the virus problem by providing mail virus protection service using award winning scanning technology. You may already have protection at your desktop or server level, but with our email virus security solution, you have the added advantage that emails are caught at the 'Gateway' level before they get anywhere near your organisation or that of your email recipients. Managed E-mail Anti-virus Service takes away the headache of protecting your company's emails against viruses, that pass to and from the internet through mail servers. This means a reduction in time and money spent on this aspect of in-house protection. As part of our anti virus service we will virus check your SMTP email or up to 15 POP3 email accounts. If you require more than 15 then we are able to increase this number for you.

## **The features of your broadband Security Pack**

- Netscreen 5XT 10 user licence Firewall
- Domain and email hosting with SMTP or up to 15 POP3 email addresses
- Anti-virus on the email addresses on the domain we are hosting
